

ICS 484 Final Project - Milestone 1

Team Name: HiVIZ

Team Members:

Name	Undergrad/Grad	Major
Calvan Liang	Undergrad	Computer Science
Derrick Luyen	Undergrad	Computer Science
Jeffrey Yu	Undergrad	Computer Science
Raena Naka	Undergrad	Computer Science

Project Description:

We will be creating a visualization based on Hawaii's population data set. We have a lot of information we are able to use to either confirm or deny any hypothesis we may have such as the ethnicities of people living here, the rate at which people move in/out of hawaii, and the type of jobs that are prevalent in the state.
